

```
Import tkinter as tk
```

```
From tkinter import scrolledtext
```

```
# Bot reply function
```

```
Def get_bot_response(user_input):
```

```
    User_input = user_input.lower()
```

```
    If "hello" in user_input:
```

```
        Return "Hi there! How can I help you?"
```

```
    Elif "how are you" in user_input:
```

```
        Return "I'm just a program, but thanks for asking!"
```

```
    Elif "bye" in user_input:
```

```
        Return "Goodbye! Have a great day!"
```

```
    Else:
```

```
        Return "I don't understand that, sorry."
```

```
# When user clicks "Send"
```

```
Def send_message():
```

```
    User_msg = user_entry.get()
```

```
    If user_msg.strip() == "":
```

```
        Return
```

```
# Display user message
```

```
Chat_area.config(state='normal')
```

```
Chat_area.insert(tk.END, "You: " + user_msg + "\n")
```

```
# Display bot reply
```

```
Bot_response = get_bot_response(user_msg)

Chat_area.insert(tk.END, "Bot: " + bot_response + "\n\n")

Chat_area.config(state='disabled')

# Clear input field

User_entry.delete(0, tk.END)

# --- GUI SETUP ---

Root = tk.Tk()

Root.title("Simple Chatbot")

Root.geometry("400x500")

# Chat window with scroll

Chat_area = scrolledtext.ScrolledText(root, wrap=tk.WORD, font=("Arial", 12),
state='disabled')

Chat_area.pack(padx=10, pady=10, fill=tk.BOTH, expand=True)

# Input field

User_entry = tk.Entry(root, font=("Arial", 14))

User_entry.pack(padx=10, pady=5, fill=tk.X)

# Send button

Send_button = tk.Button(root, text="Send", font=("Arial", 12), command=send_message)

Send_button.pack(padx=10, pady=5)

# Let Enter key send message too
```

```
User_entry.bind("<Return>", lambda event: send_message())
```

```
# Start the app
```

```
Root.mainloop()
```

see I have a all code so give me the step to build weather app  
using this code and I wand to build project on vs code
